

Dear Jason,

I would like to thank you for your professional assistance in helping us get out of a predicament and into a beautiful building in which we are very comfortable with.

As you know, we were hoping to move into an office space in the same building which was unavailable at the time. This caused our company desperation in finding a suitable location. Fortunately, you called at the right moment and we felt very comfortable with your proposal. In a short amount of time, you identified all the available space in the area and made it very easy for us to view these offices on a convenient schedule.

What we appreciated the most about your services is your assistance in negotiating a favorable lease and terms. This was a tremendous help for our company. We are growing so fast that we could not commit to a long-term lease as our real estate needs today will certainly be different in three years.

It certainly was a great pleasure retaining you for our commercial real estate needs, aside from your professionalism that you exhibited all times your personal interest in our business and needs are commendable.

Even though we are all settled down and do not have a need for your services until our lease ends it would be nice to stay in touch on a personal level.

Regards,

David Michaels, Managing Director
